

DESIGNfor VULNERABLE:  
Children and Elderly Generations:

# FINAL EVENT

March 7<sup>th</sup>  
2014

Centro Internazionale Loris Malaguzzi, Via Bligny 1/a, Reggio Emilia, Italy

The **DEVICE** project is pleased to invite you to the Final Event. Celebrate the achievements of the past two years and find out who the winners of the **DEVICE AWARD** are.

**DEVICE** is an Erasmus Multilateral Project funded by the European Commission within the Lifelong Learning Program. **DEVICE** was launched on 1st of October 2011 to respond to the European Commission's call to help companies and academic research centres to appropriately address DESIGN of Vulnerable generations: Children and Elderly. Its overarching aim is to improve the quality of life of future generations by developing training resources for designers which will support them in including the specific needs of children and elderly people within their designs.

A holistic approach to design has been adopted based on user-centred design. The project aspires to bridge traditional industrial design programs with ergonomics, usability concepts and user experience with a specific focus on **vulnerable generations** thought and to become a milestone towards the modernization of design education. The results of this project will be unveiled during the event.

Guests at the Final Event include international experts, winners of the **DEVICE AWARD**, and the project partners.

You are also invited to visit the Atelier of Loris Malaguzzi International Centre.

Caterina Calefato and The **DEVICE** Consortium

The **DEVICE** project is funded within the LIFELONG LEARNING PROGRAMME - ACTION FOR MULTIPLE BENEFICIARIES PROJECT NUMBER – 518749-LLP-1-2011-1-IT-ERASMUS-ECUE
